

Introduction to the Performers Index

You may watch the lyrics as you listen to the music and download selections to your personal music library. Click on the desired title and then *left* click on the “view the lyrics” tab. The lyrics will appear in a separate window. Click on “listening to the song” to begin the presentation. You can save the music to your computer by returning to the listening window, left clicking on the music player window and choosing the “save” option. Using “Converter Lite”, a free on line program, you can convert the mp3 format to WAV if your CD player doesn’t play mp3 songs.

(To search songs alphabetically for each performer, read across the columns, not down.)
